PHILIPS
sense and simplicity

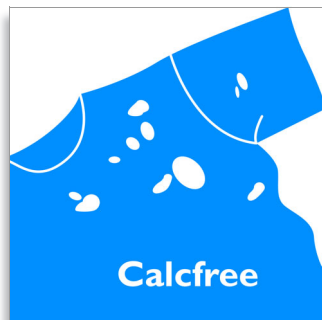

Highlights

99% calc-free* filtered water

The ion exchange resin filled in the cartridge takes out the 99%* scales from the tap water; it ensures treated water which could be used for ironing. *Under 25 L of water treatment at 8.4 dH

Prevents leaving calc residues

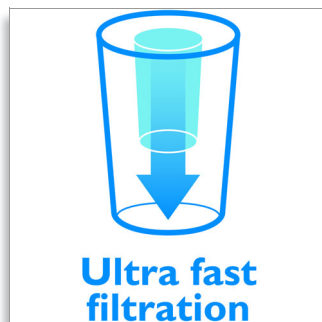

The extra effective cartridge helps prevent scale building up. While you are ironing, your expensive dress will not be ruined by the calc residues. You will be looking good with well ironed clothes.

Consistent steam flow

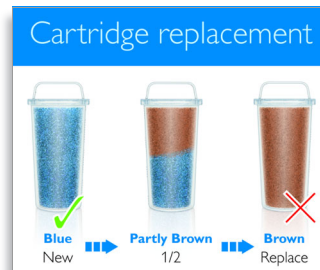

Demineralized water from IronCare will help prevent the scale build up quickly in the iron: inside of the soleplate and boiler. Calc particles will not block the steam holes, you will be getting the consistent steam coming from your iron; it makes your ironing experience more pleasant.

Ultra fast filtration

The special designed cartridge could allow water going through the cartridge quickly; it allows you have quick ironing start without waiting. Placing IronCare next to you, to refill your iron at anytime, without taking your iron everytime to access the sink for refilling.

Cartridge replacement

The color change of the cartridge will appear gradually according the amount of treating water, from top to bottom. You will be able to recognize the color change at the life span of the cartridge from blue to brown. Replace your cartridge when it changes color completely to brown, ensure the appliance optimum performance.

Up to 3 months ironing

Due to the difference of the water hardness where you are coming from, and also difference on ironing hours per week the lifetime of your cartridge is different pending on that situation; 1 cartridge will last up to 3 months of ironing time.

Suitable for IronCare

Replacement cartridge can keep your IronCare to perform optimum. This cartridge will be suitable for Philips IronCare water descale filter for ironing, GC024.
